TABLE OF CONTENTS FOR "RADIO PARTS" BY I. YU. TEMPER

[This is a manual written primarily for dealers of radio parts. The technical information given is very basic and is intended only to help the dealers handle radio parts more intelligently. However, some sections may prove useful as reference material, e.g., the table (very much like that found in The Radio Amateur's Handbook in format) of Soviet tube types and their characteristics.]

TABLE OF CONTENTS

	Page
Foreword	1
I. Radio Engineering Information	
1. Principles of Radio Transmission and Reception	5
2. The Spectrum of Electromagnetic Waves	7
3. Wave Propagation	9
4. Interference	10
II. Radio Parts	
1. Symbols for Radio Parts in Circuits	12
2. Resistors	14
3. Capacitors	18
4. Coils	20
5. Chokes and Audio-Frequency Transformers	30
6. Loudspeakers and Telephones	35
7. Power Supplies for Battery Receivers	38
8. Equipment for Electrical Reproduction of Phonograph Records	46
9. Assembly Parts and Materials (Chassis, Telephone Jacks, etc.)	48
III. Radio Tubes	
1. General Information	52
2. Tube Designations and an Assortment of Tubes	55
3. Special Tube Types (Oscillators, Acorn Tubes, Miniature Tubes, Ballast Tubes, etc.)	58

50X1-HUM

	<u>Page</u>
4. Characteristics of Soviet Tube Types and Base Diagrams	60
5. The New System of Tube Designations <u>Lists</u> tubes under the following classifications: low-power tubes, modulator triodes, medium-wave triode oscillators, short-wave triode, tetrode, and pentode oscillators, ultrashortwave triode, tetrode, and pentode oscillators, kenotrons, gas-filled rectifiers, thyatrons, and cathode-ray tubes	66
IV. Radio Receivers	
1. Crystal Receivers	72
2. Vacuum-Tube Receivers	75
3. Television Receivers	94
V. Checking the Quality of Radio Parts	
1. Completeness of Parts	96
2. External Appearance	97
3. Electrical Check of Parts	98
4. The Simplest Method of Checking Radio Parts	104
5. Storage of Radio Parts	106
VI. Drawing Up Orders for Radio Parts	108
Appendix I. List of USSR Broadcast Stations (and Wave Lengths)	113
